

BARRY SAMPATH

Cybersecurity & IT Analyst | Identity Security | Risk & Assurance

0494 350 950 | barry.sampath@outlook.com | linkedin.com/in/barrysampath | Brisbane, QLD 4053 | bharath-blazecode.github.io

SUMMARY

Second-year Bachelor of IT student at QUT (Cybersecurity & AI), currently working as a Cybersecurity & IT Automation Analyst with hands-on experience deploying Microsoft Entra ID, Conditional Access policies, and identity security controls in a live client environment. Developing an ITDR home lab using Wazuh SIEM and MITRE ATT&CK detection mapping to build hands-on threat detection and data analytics skills. Active in the cybersecurity community through AISA Brisbane membership and CTF volunteer work. Brings strong technical delivery, risk documentation experience, and clear client communication to technology risk and assurance environments.

PROFESSIONAL EXPERIENCE

Cybersecurity & IT Automation Analyst | *ScienceGears* | Apr 2026 – Present

- Deployed and managed Zero Trust IT controls using Microsoft Entra ID, configuring MFA enforcement, Conditional Access compliance policies, and role-based access governance across a live client environment.
- Built an AI-assisted email triage system that classifies and validates incoming correspondence, generating structured draft replies for client review and reducing manual processing time.
- Automated IT operational workflows using Python scripting, reducing manual overhead and improving consistency of security control application across client operations.
- Conducted risk assessments across identity security posture and access governance, producing prioritised remediation reports that translated technical IT control findings into clear client-facing guidance.

Technology Consultant (Power Platform) | *DynamX Institute* | Apr 2026 – May 2026

- Designed and delivered a working Power Platform business system for a real-world client scenario, applying requirements analysis and solution design from brief through to final submission.
- Mapped business processes and modelled solution architecture, iterating through multiple structured feedback cycles to strengthen delivery quality.
- Presented solution findings and design rationale to program assessors, practising the client communication and structured reporting expected in a consulting environment.

Event Officer | *Code Network* | Mar 2026 – Present

- Coordinated end-to-end logistics for university technology events, managing venue bookings, scheduling, and attendee coordination for up to 40 participants per event.
- Managed communication across stakeholders, volunteers, and attendees to ensure consistent and well-run event delivery.

Customer Service Supervisor | *Coles Group* | May 2025 – Present

- Supervised customer service operations across a high-volume retail team, maintaining consistent service standards and team performance under pressure.
- Trained and onboarded 20+ team members on POS procedures, refunds, and customer communication standards.
- Resolved escalated customer complaints, maintaining team morale and service quality during peak trading periods.

SKILLS

- **Security & IAM:** Microsoft Entra ID, Conditional Access, MFA, Zero Trust, Wazuh SIEM, MITRE ATT&CK, risk & compliance, IT controls review
- **Programming & Data:** Python, SQL, data analysis, AI/ML fundamentals
- **Tools & Systems:** Microsoft 365, Power Platform, GitHub, Raspberry Pi, VMware Workstation, Sysmon
- **Networking:** Networking fundamentals, cryptography, hardware troubleshooting
- **Professional:** Communication, leadership, stakeholder engagement, customer service, time management, adaptability

EDUCATION

Queensland University of Technology

Bachelor of Information Technology — Cybersecurity & Artificial Intelligence | Feb 2026 – Nov 2027

GPA: 6.286 / 7.000

Queensland University of Technology

Diploma of Information Technology | Feb 2025 – Nov 2025

GPA: 6.250 / 7.000

Habitat Schools (Ajman, UAE)

CBSE Senior Secondary Education — Science Stream | Apr 2019 – May 2024

CERTIFICATIONS

- CompTIA A+ Certification (In Progress)
- Harvard — CS50's Introduction to Programming with Python (In Progress)
- Google — Foundations of Cybersecurity (2025)
- Forage — Commonwealth Bank Introduction to Data Science Job Simulation (2025)

PROJECTS

ITDR Home Lab — Identity Threat Detection & Response | Personal Project | Jun 2026 – Present

- Built an isolated detection lab using Wazuh 4.9.2 SIEM on Ubuntu Server and Sysmon on Windows 11 VM to simulate and detect identity-based attacks mapped to MITRE ATT&CK (T1078, T1110, T1059.001, T1136.001).
- Wrote custom XML detection rules and built a Python pipeline integrating the VirusTotal API to enrich alerts and generate structured incident reports, simulating an IT audit trail for identity-based attack scenarios.

LUNA — TurboPi Intelligent Robot | Queensland University of Technology | Jul 2025 – Nov 2025

- Built a Raspberry Pi 4B robot integrating Python, computer vision, voice control, and PID-tuned movement, applying critical thinking to debug hardware-software interaction under real physical constraints.
- Collaborated with a project partner across all phases from hardware assembly through to software integration, documenting findings and outcomes on GitHub.

LEADERSHIP & VOLUNTEERING

Cybersecurity CTF Events Volunteer | Cyber in Motion | Apr 2026 – Present

- Supported planning and delivery of hands-on CTF events, managing setup, briefing materials, and on-the-day participant support for Cyber in Motion.
- Placed 3rd at CIMCTF 2026 with team SushiShield, competing in identity, web exploitation, and OSINT challenge categories.

Events & Student Engagement Volunteer | QUT Guild | Aug 2025 – Nov 2025

- Supported delivery of student engagement events across campus, contributing to on-the-day coordination and communication for QUT Guild initiatives.
- Assisted with event logistics and stakeholder communication, building teamwork and coordination skills across multiple campus initiatives.
